

FOR IMMEDIATE RELEASE:

NeoTool Moves to the Dallas, Texas Area to Expand Team to Better Serve Customers and Further Accelerate Growth

Focus on Hiring Talent to Enhance Customer Service, Product Development, and Sales Efforts

PLANO, Texas, May 2, 2005 – NeoTool has moved its corporate headquarters to Plano, Texas, to further accelerate and support its growth as a leading healthcare integration software, training, and consulting company in the market.

"We are excited about moving to Plano. With this move, NeoTool has a great opportunity to continue to build a talented team to support our growing customer base of hospitals, imaging centers, laboratories, healthcare software vendors, and medical device manufacturers," states Phil Guy, NeoTool CEO.

Plano was selected because of the talented people living in this area. "Finding extraordinary people to meet the high customer standards that we have set is always challenging," Guy added. "However, the Plano area has a great community of healthcare providers and vendors, and we believe that this will provide NeoTool with an excellent long term base from which to grow."

Operations have seamlessly transferred from Montrose, Colorado to the new Plano location. Customer Support, Sales, Development, and Training resources are fully operational.

About NeoTool:

NeoTool's healthcare integration solutions empower organizations to develop, test, deploy, and manage data exchanges between healthcare applications and providers. Through software, training, and consulting, NeoTool is the largest firm dedicated solely to HL7 and healthcare application interfacing. NeoTool customers include healthcare providers (e.g., hospitals, imaging centers, labs, and clinics) and healthcare software application providers and medical device manufacturers. www.neotool.com
